The main fire station, soon to be expanded Thrift Store, as the fire department left it. The building was going to need some remodeling to make it consumer friendly and provide room for all the furniture and appliance donations anticipated.

In what seemed like a very short time, the building had been transformed. Sporting new walls, a central heat and cooling system, new windows, interior walls, and ceiling fans the facility is now roomy and light.

Although the store is roomy you can see it is still packed with merchandise.

In this end of the store larger items such as furniture and appliances can be displayed.

Whether customer or donor we are always happy to see you.

Standing in front of the brand new fire engine are some of the volunteers whose efforts paid for half the cost of the truck.
